

Nursery Autumn 1

Why do leaves go crispy?

This term our new topic is called 'Why do leaves go crispy?'

We will be learning all about the changes that occur in autumn. We will go on an autumn walk to observe the changes in our environment as well as collect autumn 'treasures' to create artwork related to the season. We will also be learning about Harvest by making harvest soup and baking bread.

You can help at home by talking about the changes during autumn e.g. conkers on the ground, leaves turning orange/red/yellow/brown, shorter days etc. and talk about the meaning of harvest and where our food comes from.
